

Image Download Steps

1. Double-click the folder you wish to open. If it is a private folder you will need the password that I have given you.
2. Double-click the first image or the desired image you wish to download to enlarge the image. If I have locked the menu option to download, you will need the password I have given you to continue.
3. Move the mouse pointer over the upper left-hand corner to activate the menu for options.
4. Click the menu option 'Download Original', then choose this image or all available.
5. Click 'Save'. You will be prompted with the dialog box prompting you for the location on your computer where to save the images.
6. Mission complete! Enjoy your images.
